## Profile

---

AI and Software Development enthusiast with hands-on experience in full-stack web development, cloud deployment, debugging, testing, and software maintenance. Skilled in JavaScript, TypeScript, Python, React, Angular, Node.js, and Django. Experienced in building scalable web applications, integrating APIs, troubleshooting application issues, supporting technical documentation, and following the Software Development Lifecycle (SDLC). Passionate about continuous learning and exploring emerging web, mobile, and AI technologies.

## Education

---

|                                                                                                       |                                        |
|-------------------------------------------------------------------------------------------------------|----------------------------------------|
| <b>Christ University</b><br><i>B.Tech in Computer Science and Engineering</i>                         | Jun 2023 – May 2027<br>GPA: 3.93 / 4.0 |
| <b>Infant Jesus Anglo Indian Higher Secondary School, Kerala</b><br><i>Higher Secondary Education</i> | Jun 2008 – Mar 2023<br>Class XII: 93%  |

## Experience

---

|                                                                                                                       |                     |
|-----------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>Genrobotics Innovations Pvt. Ltd.</b><br><i>Software Development Intern (ERP System Development) [GitHub Link]</i> | Apr 2026 – May 2026 |
|-----------------------------------------------------------------------------------------------------------------------|---------------------|

- Built, tested, debugged, and maintained a full-stack ERP system using Angular, TypeScript, Node.js, Express.js, Sequelize, and SQLite; contributed to deployment workflows and troubleshooting application issues across multiple modules.
- Designed and enhanced procurement and inventory modules (PR, PO, GRN, MRN, Inventory Tracking), reducing manual workflow steps and improving operational efficiency for 3 cross-functional teams.
- Maintained and tested front-end and back-end microservices, troubleshooting application issues, coding bugs, and performance bottlenecks across ERP modules.
- Implemented RBAC, JWT authentication, approval workflows, and real-time notifications to improve system security posture and operational efficiency.
- Delivered vendor management, quotation analysis, quality inspection (IQC), and payment management modules within a proprietary ERP platform.

|                                                                      |                     |
|----------------------------------------------------------------------|---------------------|
| <b>ApexPlanet</b><br><i>Front End Developer Intern [GitHub Link]</i> | Nov 2025 – Dec 2025 |
|----------------------------------------------------------------------|---------------------|

- Developed and maintained responsive web applications using React, JavaScript, HTML, and CSS, troubleshooting UI issues and optimizing application performance.
- Integrated front-end interfaces with back-end APIs, demonstrating debugging skills across the full web development lifecycle and ensuring seamless data exchange.
- Collaborated in a team-driven environment to optimize application performance and maintainability, following modern front-end development and testing best practices.

|                                                                                |                     |
|--------------------------------------------------------------------------------|---------------------|
| <b>Soften Technologies</b><br><i>Full Stack Developer Intern [GitHub Link]</i> | Apr 2025 – May 2025 |
|--------------------------------------------------------------------------------|---------------------|

- Developed a scalable full-stack e-commerce application using Django and MySQL, supporting product management, cart functionality, and order processing workflows.
- Designed and implemented REST APIs for seamless front-end/back-end integration; conducted testing across endpoints to verify reliability and scalability.
- Implemented secure user authentication, session management, and RBAC to meet security requirements throughout the software development lifecycle.
- Prepared technical documentation, API references, and workflow diagrams to support development and maintenance activities.

**Machine Learning Intern** [GitHub Link]

- Developed a Python-based data pipeline using Pandas and NumPy to process 10,000+ records, reducing preprocessing time by ~30% through automated workflow design.
- Built interactive dashboards and authored technical documentation of data workflows and insights for stakeholder review, supporting data-driven decision-making.
- Collaborated via Git/GitHub, demonstrating adaptability and enthusiasm for learning new data science methodologies in a fast-paced environment.

**Technical Projects**

---

**University Chatbot System – GenAI / NLP***Ongoing*

- Developing an NLP-based chatbot using LLMs for intelligent multi-turn conversations, applying innovative GenAI techniques to solve real university knowledge-access challenges.
- Integrated LLM APIs for dynamic knowledge retrieval and automation workflows; iteratively debugged and tested response accuracy across diverse query types.

**Cybersecurity Threat Detection Dashboard** [GitHub Link]

- Built an AI-powered anomaly detection system using Isolation Forest achieving 93% recall; designed automation workflows and real-time monitoring dashboards for threat detection.
- Followed a structured SDLC from data ingestion to deployment, including testing and technical documentation of detection thresholds and alert logic.

**Sentiment Analysis for Product Reviews** [GitHub Link]

- Built an NLP pipeline using Scikit-learn achieving 88% accuracy; designed an automated text processing workflow using TF-IDF with comprehensive model evaluation and testing.
- Deployed a real-time prediction interface using Streamlit, enabling interactive end-user testing and feedback.

**Deep Learning Image Classification System**

- Built a CNN classifier achieving 91% validation accuracy; applied transfer learning and optimized model performance through systematic experimentation and hyperparameter debugging.

**Technical Skills**

---

- **Programming Languages:** Python, Java, C, SQL, JavaScript, TypeScript, HTML, CSS
- **AI / ML / GenAI:** Machine Learning, Deep Learning, Natural Language Processing (NLP), Generative AI (LLMs), TensorFlow, Keras, TF-IDF, Model Evaluation
- **Web Development:** Angular, React, Node.js, Express.js, Django, Flask, Streamlit (front-end & back-end development), MySQL, SQLite, Sequelize ORM
- **Cloud & DevOps:** AWS, Cloud Deployment, Docker, Git, GitHub, REST APIs, JWT Authentication, CI/CD Fundamentals
- **SDLC & Practices:** Debugging, Testing, Unit Testing, Technical Documentation, Software Development Lifecycle, Agile Collaboration
- **Core Computer Science:** DBMS, Operating Systems, Computer Networks, OOP, Data Structures & Algorithms
- **Enterprise Systems:** ERP Development, Procurement Management, Inventory & Workflow Automation

**Certifications**

---

- Swayam NPTEL: Data Analytics with Python [IIT Roorkee]
- AWS Academy: Cloud Foundations
- Cisco: Introduction to Artificial Intelligence
- Cisco: Introduction to Data Science
- Infosys: Networking Basics
